

No Food or Drink Allowed Here!

In Procedural areas

near Biohazards

Near chemicals or in
Environmental Service closets

In patient/resident care areas

OSHA's bloodborne pathogens standard prohibits the consumption of food and drink in areas in which work involving exposure or potential exposure to blood or other potentially infectious material takes place, or where the potential for contamination of work surfaces exists [29 CFR 1910.1030(d)(2)(ix)]. Also, under 29 CFR 1910.141(g)(2), employees shall not be allowed to consume food or beverages in any area exposed to a toxic material.
