

Storage tips for

CLEAN LINEN

Clean linen must be stored and dispensed in a manner to prevent contamination.

- Store linen 2 inches from the wall to safeguard linen integrity.
- Ensure a solid bottom shelf, 8 inches from the floor, to prevent contamination from mopping/cleaning.
- Keep top of linen stack no less than 18 inches below the ceiling to prevent impairment of ventilation, sprinklers, and lighting.
- Cover linen if not in a cart or a closet dedicated solely to clean linen storage. If linen is stored in a dedicated linen closet, then the doors must be closed whenever linen is not being accessed.

DO YOUR PART TO KEEP LINEN CLEAN!
