

Personal Protective Equipment (PPE)

Supplies necessary for adherence to personal protective equipment recommendations specified for **Standard** and **Transmission-based Precautions** (e.g., gloves, gowns, mouth, eye, nose, and face protection) should be available and located at, or near, point of use. Options for having PPE at point of use include:

1. Over-the-door hangers,
2. Storage boxes for wall mount, and
3. Utilizing cabinet/drawer space outside of patient rooms.

Examples of good point of use PPE storage are shown below:
